Back-End: Node.js, Express.js, Web APIs, User Authentication, OAuth
Databases: MySQL
Testing: Jest, Enzyme
Deployment & Development Tools: Heroku, GitHub, WebPack

PROFILE

Working in operations at my previous employer, I had the opportunity to test & provide feedback on our proprietary fleet-management app to our developers.

Witnessing the positive impact the app had on our employees, operations, & business as a whole, inspired me to become a developer.

My goal is to enable the same level of efficiency & effectiveness in other small businesses through technology.
